PROJECTS

Ojiyo , Multi-Vendor E-Commerce Platform

Tech Stack:

Typescript, ReactJS, React Native, NodeJS, ExpressJS

- Built and improved UI features using ReactJS, React Native, Tailwind CSS, and TypeScript.
- Developed new screens and fixed UI issues across web and mobile platforms.
- Created and integrated APIs, and worked with real-time data in production environments.
- Implemented features like product modals, and dynamic pricing.

07/2025 – Present

Bitesy , Multi-branch food ordering and restaurant management platform

Tech Stack:

Typescript, ReactJS, NodeJS, ExpressJS

Bitesy is a food-tech platform that helps restaurants and food vendors manage products, orders, branches, customers, and sales from a single dashboard. It supports multi-branch operations, staff management, analytics, promotions, and real-time order handling for restaurant businesses.

Key Features

- Multi-branch product and inventory management
- Online food ordering and order tracking
- Vendor, owner, and branch manager role system
- Sales analytics and dashboard reporting
- Promotions, categories, reviews, and customer management

04/2026 – Present

SMN-News , NewsPlatform

Tech Stack:

React Js, CSS, Django, PostgreSQL

- Developed a news web application with integrated live TV streaming.
- Built dynamic news listing, category filtering, and detailed article pages.
- Implemented a CMS dashboard to manage news content, live streams, and advertisements.
- Added an advertisement system for displaying and managing ads across the platform.
